

WE GIVE LOCAL  
INTELLIGENCE TO MACHINES

# THE PROBLEM WE SOLVE:

## MAINSTREAM AI POORLY SERVES INDUSTRIAL APPLICATIONS

Need **massive datasets**

**Slow**, expensive learning

Learning is **not incremental**

Learning is **not local (Cloud)**

**Blackbox** (decisions can't be explained)

**Data safety & privacy** issues

Very **expensive in energy, bandwidth, compute**

# THE COGITO SOLUTION

REAL-TIME INTELLIGENCE “AT THE EDGE”

FOR BOTH LEARNING AND INFERENCE

Massively Parallel Cognitive H/W

Software environment for teaching the machine

Easy to use by non-IT domain experts

Does not need more data than human operators

Real-time, “on-the-job” learning and sharing

Fast, compact, low-power, auditable recognition

Knowledge ownership is clear and simple

1<sup>st</sup> generation products available, certified, successful

**2<sup>nd</sup> generation development → Funding Need**

## THE BRAIN

CI-Core-1

CI-912x

Gen 2 SIP

Data

Recognition

## THE CLASSROOM

CogiTools

# THE BUSINESS MODEL

We sell:

**The Brain** as Hardware. 1 per machine.  
ASP between \$100 and \$1000  
depending on configuration and memory size

**The Classroom** as bundled Software  
15% of H/W value per year/per Brain

**The Knowledge** as downloadable content  
30% of content value  
70% goes to the content creator  
One download counted for each brain

## THE BRAIN

## THE CLASSROOM

CogiTools

## THE KNOWLEDGE

iKnow

# COGITO DIFFERENTIATION

## COGITO's DIFFERENTIATION :

- LEARN **LOCALLY**
- LEARN IN **REAL TIME** (milliseconds)
- LEARN **INCREMENTALLY**
- LEARN FROM **LIMITED DATA**
- LEARN FROM **FACTORY OPERATORS**
- **EXPLAIN** OUR CLASSIFICATION RESULTS
- LEARN WITH SMALL **CO2 FOOTPRINT**

COMPETITION (Google Coral, Nvidia Jetson, Intel Movidius, etc...)

- LEARN **IN THE CLOUD**
- LEARNING TAKES **HOURS**
- FORGET AND **LEARN AGAIN**
- LEARN FROM **BIG DATA ONLY**
- LEARN WITH **IT GURUS**
- **NOT EXPLAINABLE** RESULTS
- LEARNING IS **CRAZY EXPENSIVE**

*Training a single AI model with Deep Learning can emit as much carbon as 5 cars in their lifetime - MIT Tech Rev.*

# FOCUSING ON HIGH-GROWTH END-MARKETS

## First Priority: Smart Machines & Robots

# COGITO CUSTOMER TRACTION - PIPELINE

## 3 MAJOR APPLICATION DOMAINS

- **VISUAL INSPECTION**

- 3 on-going pilot projects with industry leaders for deployment in 2021
- Huge opportunity as surface inspection is still manpower intensive
- System Integration partners in Switzerland and France.

- **ROBOT GUIDANCE**

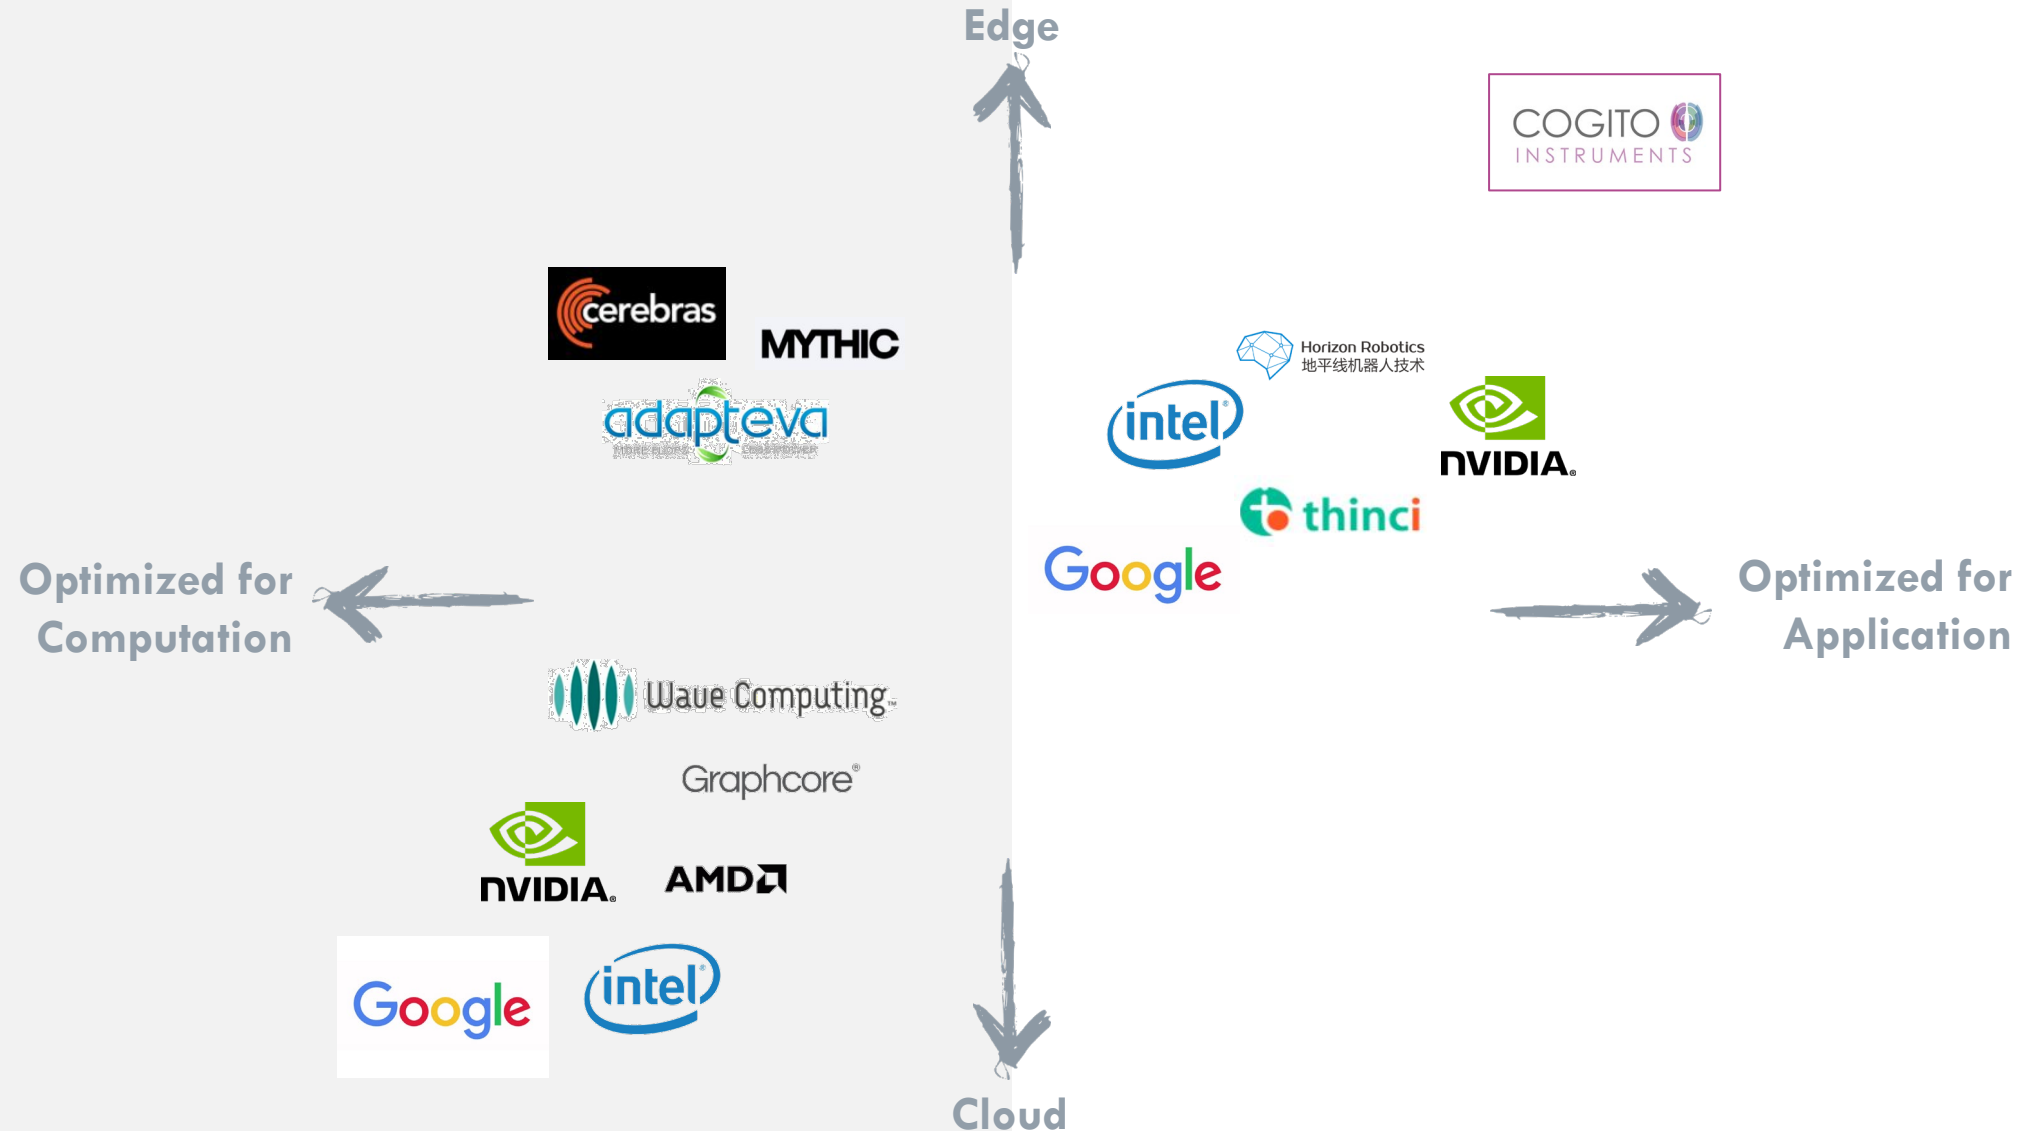

- Pilot completed
- Huge opportunity as robots need to become trainable and low-cost
- System Integration partner in Switzerland with access to Asian markets

- **MACHINE MONITORING & PREDICTIVE MAINTENANCE**

- **+GF+** project progressing well, opening new opportunities inside GF
- Other opportunities with large industrial companies

# COMPETITIVE LANDSCAPE

# WHO?

**Philippe LAMBINET**

**CEO**

**Innovating is easy,  
Delivering innovation, and scaling it, is hard.  
This team has done it, repeatedly**

- . GM of \$1B+ businesses at ST / Chief Strategy Officer
- . **CEO of startup going to IPO & startup sold to a tech giant**

**Eric JUMELET**

**COO**

- . BU Manager (\$500M+) at ST
- . Group VP Strategy at ST & COO of startups

**Jacques CHAVADE**

**CTO**

- . Group VP Design and Engineering at ST
- . Successfully introduced high-volume leading-edge products

**A very strong team with a successful track record  
is inventing the future of real-time AI at the Edge**

# INVESTMENT

# MILESTONES

Seed	€800K	Q3-17	Deliver MVP Seed industrial market Engage with 5 lead customers Partnership with National Instruments	Done
Pre-Series A	€1300K	Q3-18	Engage more MVP customers Finalize Gen2 definition and deliver: <ul style="list-style-type: none"> <li>. Patents</li> <li>. Detailed architecture specification</li> <li>. Neuron simulation and FPGA</li> </ul>	
Series A	€5000K	2020	Implement Gen2, protos in 12 mths Engage lead customers with Gen 2  More MVP customers engaged Build the team (R&D, Sales, Support)	Use of Proceeds 1/3 SG&A 2/3 R&D

# 5 YEARS RESOURCE PLAN

Resources end of YEAR	2020	2021	2022	2023	2024
Management	3	3	3	3	3
R&D Headcount	5	8	14	19	23
R&D Subco	0	0	0	0	0
Apps Devpt & Support	2	2	4	6	9
Sales & Marketing	2	2	5	8	10
Admin & Finance	1	1	2	3	4
Geneva	6	6	11	17	22
Grenoble	7	10	17	22	27
TOTAL	13	16	28	39	49

# 5 YEARS BUSINESS PLAN

COGITO: THE VALUE IS IN THE WISDOM  
DATA → KNOWLEDGE → WISDOM

*Thank you!*

# APPENDIX

# COGITO PILOT PROJECTS — VISUAL INSPECTION

SEVERAL ACTIVE PROJECTS BASED ON OUR **CORE1** GENERIC PLATFORM

- **Surface Inspection Writing Instruments (2021 deployment)**

- **Visual Inspection Cosmetic Bottles (2021 deployment)**

- **Visual Inspection of Textile/Paper**

# COGITO PILOT PROJECTS — ROBOT GUIDANCE

COOPERATION WITH AN INDUSTRIAL PARTNER (SUNROCK) TO  
BUILD A COMPLETE GUIDANCE SOLUTION BASED ON OUR  
**CORE1** GENERIC PLATFORM

- **READY TO DEPLOY** AS SOON AS COVID-19 ALLOWS
  - STRONG INTEREST IN ASIAN MARKETS
- **EASY TO TRAIN** — NO PROGRAMMING NEEDED
- **ROBUST** AND FAST RECOGNITION
- **UNIVERSAL** - ADAPTS TO ANY PICK AND PLACE ROBOT

ALL AVAILABLE GUIDANCE SOLUTIONS NEED PROGRAMMING  
AND/OR LARGE TRAINING DATA SETS AND CANNOT BE TRAINED  
IN REAL TIME BY AN OPERATOR. **COGITO SOLVES A MAJOR  
INDUSTRY PROBLEM.**

**GF Machining Solutions**

# **GFMS DIGITAL TRANSFORMATION PACE PROJECT: A COLLABORATION WITH COGITO**

# THE HURDLE: ETRACKING DEFECT DETECTION

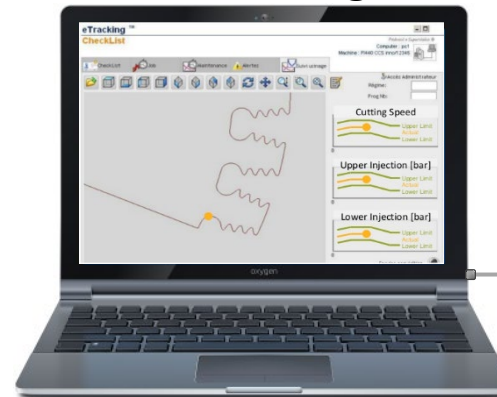

**Need to go to  
the msec to get  
the defect**

**Machining Data**  
Every 1 second  
(MT Connect)

**eTracking**

**Data file**  
stored for all  
produced part

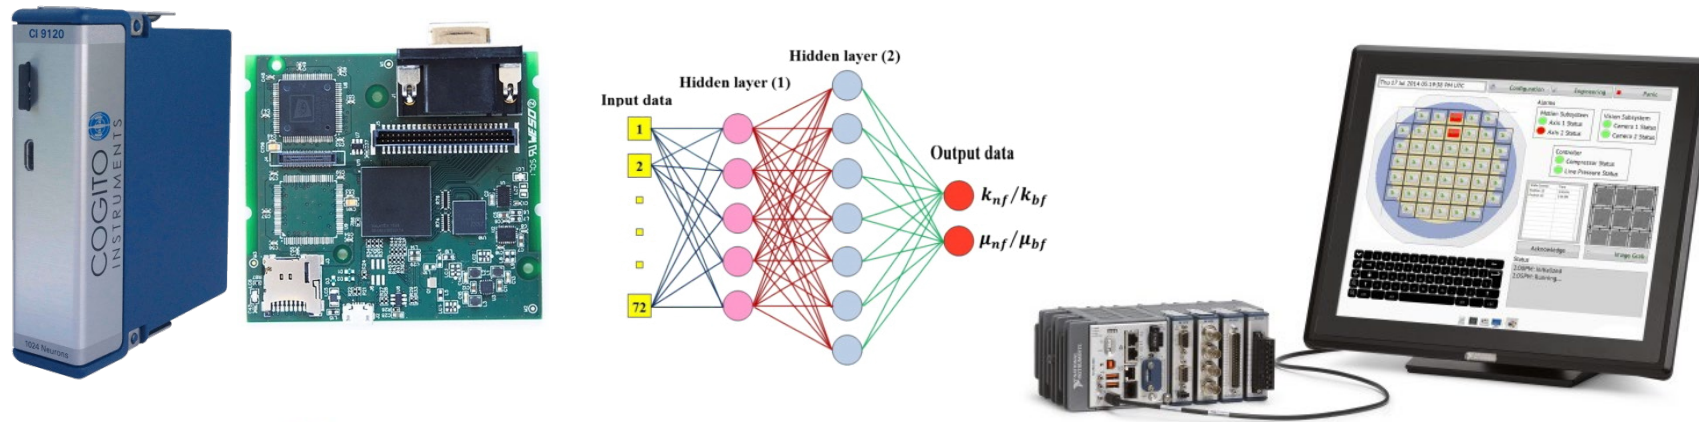

SELECTED SOLUTION

# AI HARDWARE CLASSIFICATION SYSTEM

## Cogito Instruments

- Innovative **hardware accelerated Neural Network** concept (RBF).
- Fast and deterministic : constant **Low Latency of 50μs** for any knowledge complexity.
- Designed for real-time image processing, or multipurpose signals (sensors, etc.)
- **Evolving and context** sensitive, thanks to **Machine Learning** approach.
- Compact hardware solution (NI Compact-RIO for prototyping)
- Quick development of algorithms and front-ends (NI LabVIEW)

COGITO  
INSTRUMENTS

<https://cogitoinstruments.com/>

# BENEFITS

## Highly portable system

the system is exploitable for many TU applications  
(yet not intrusive to the process).

## Unlimited uses cases

- Image & Signal processing
- Modelling where BIG data with many variables have to be considered

## Extremely accurate on prediction

( $\approx 95\%$  of success,  $\pm 50\mu\text{m}$  localization)

able to generalize knowledge to find new anomalies.

## Safe, simple and accessible

# COGITO ECOSYSTEM DEVELOPMENT

- PARTNERSHIPS
  - Already 4 system integration partners active (Switzerland, Italy)
  - 2 more in discussion (France)
- 2 INNOSUISSE PROGRAMS
  - MACHINE MONITORING WITH GF and HEPIA Electronics Lab
  - COGITOOLS with HEPIA (Optics, AI and Electronics Labs)
- Signed MOU with STMicroelectronics
