

SINAY

Digitalizing the Ocean

www.sinay.ai
yanis.souami@sinay.fr

The Ocean economy will be **\$3Trn** in 2025

Problem

Environmental & logistics managers make crucial decisions based on outdated and partial data

80 % of them still use paper reports

LOGISTIC NOT OPTIMIZE

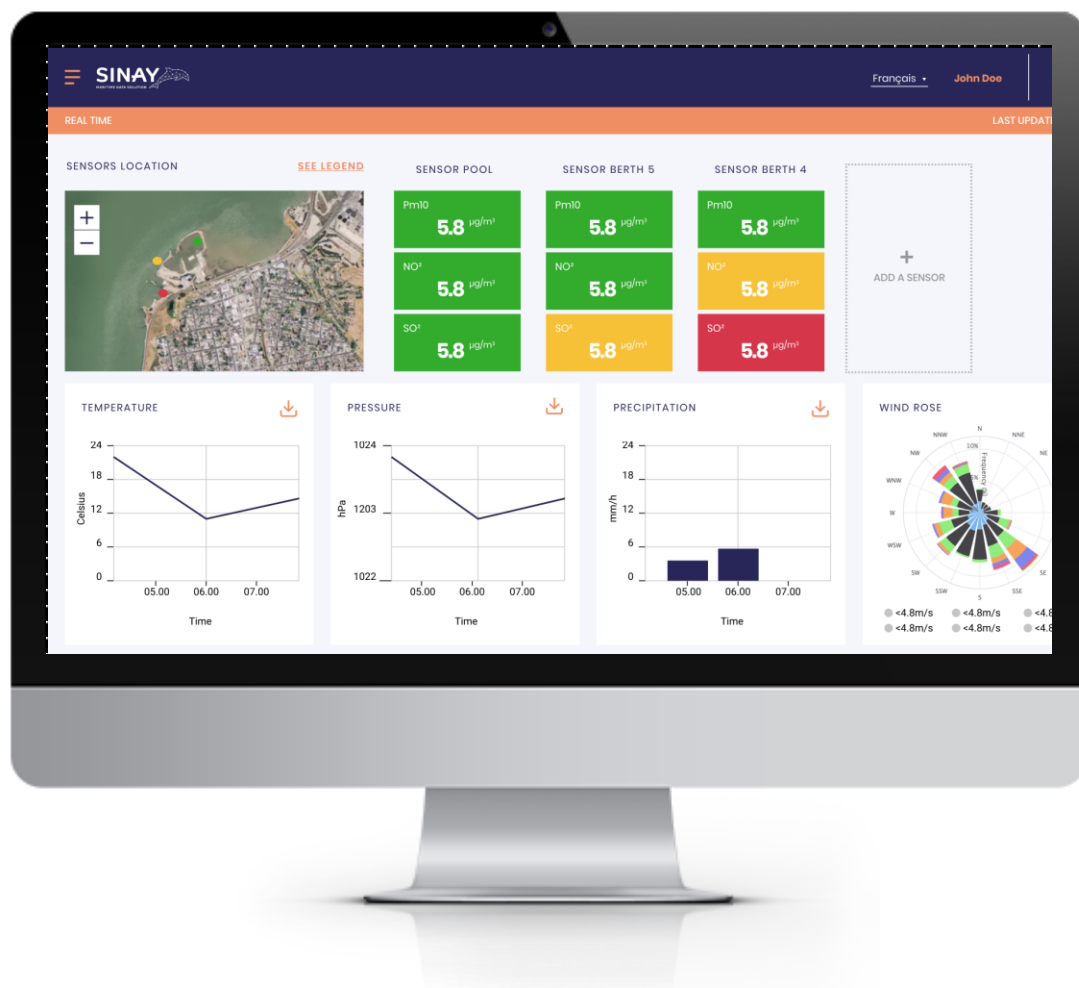

Loose time and money

NOT SUSTAINABLE

*Polluting the ocean
No permit or stop activities
Bad branding*

Benefits of our solution

A single AI platform to make sustainable decisions based on maritime data

Save

30% operational costs

Save

12 months of reporting delay

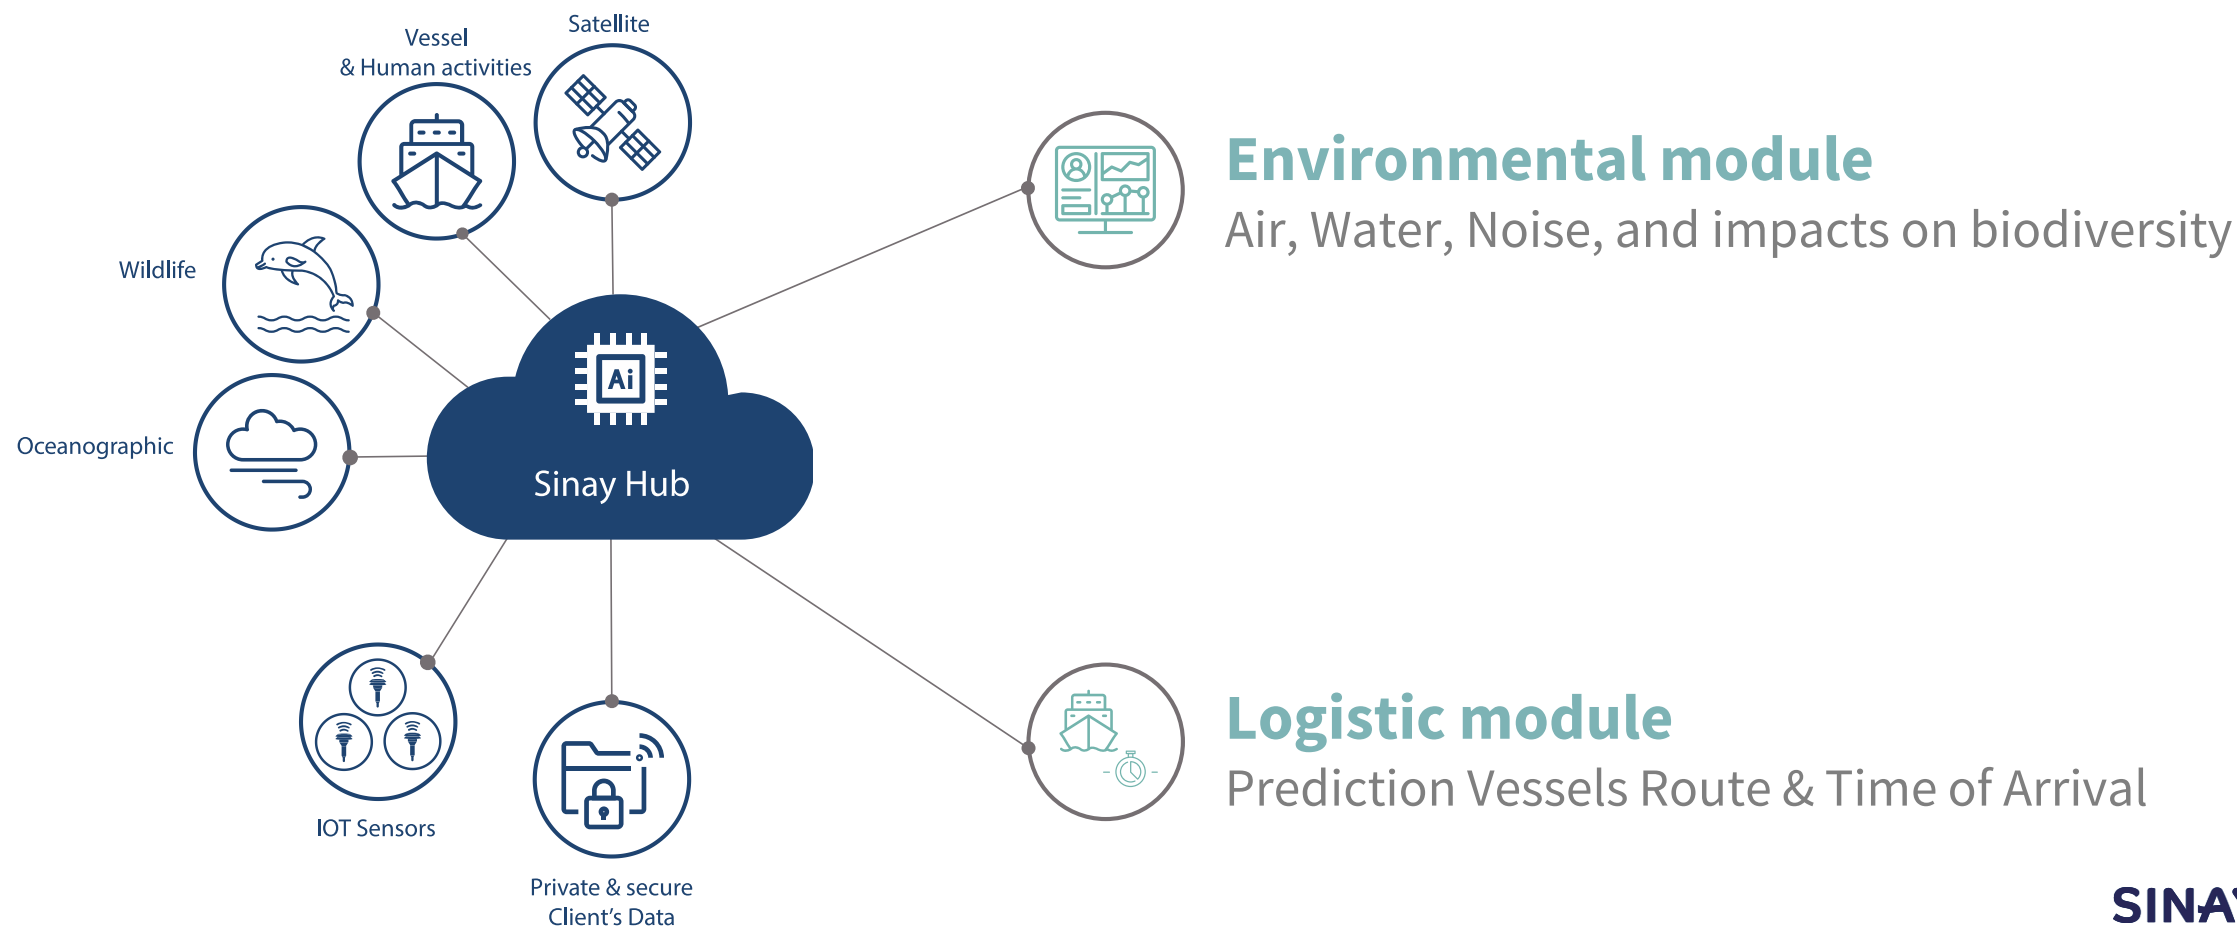

Avoid

Pollution events

Product

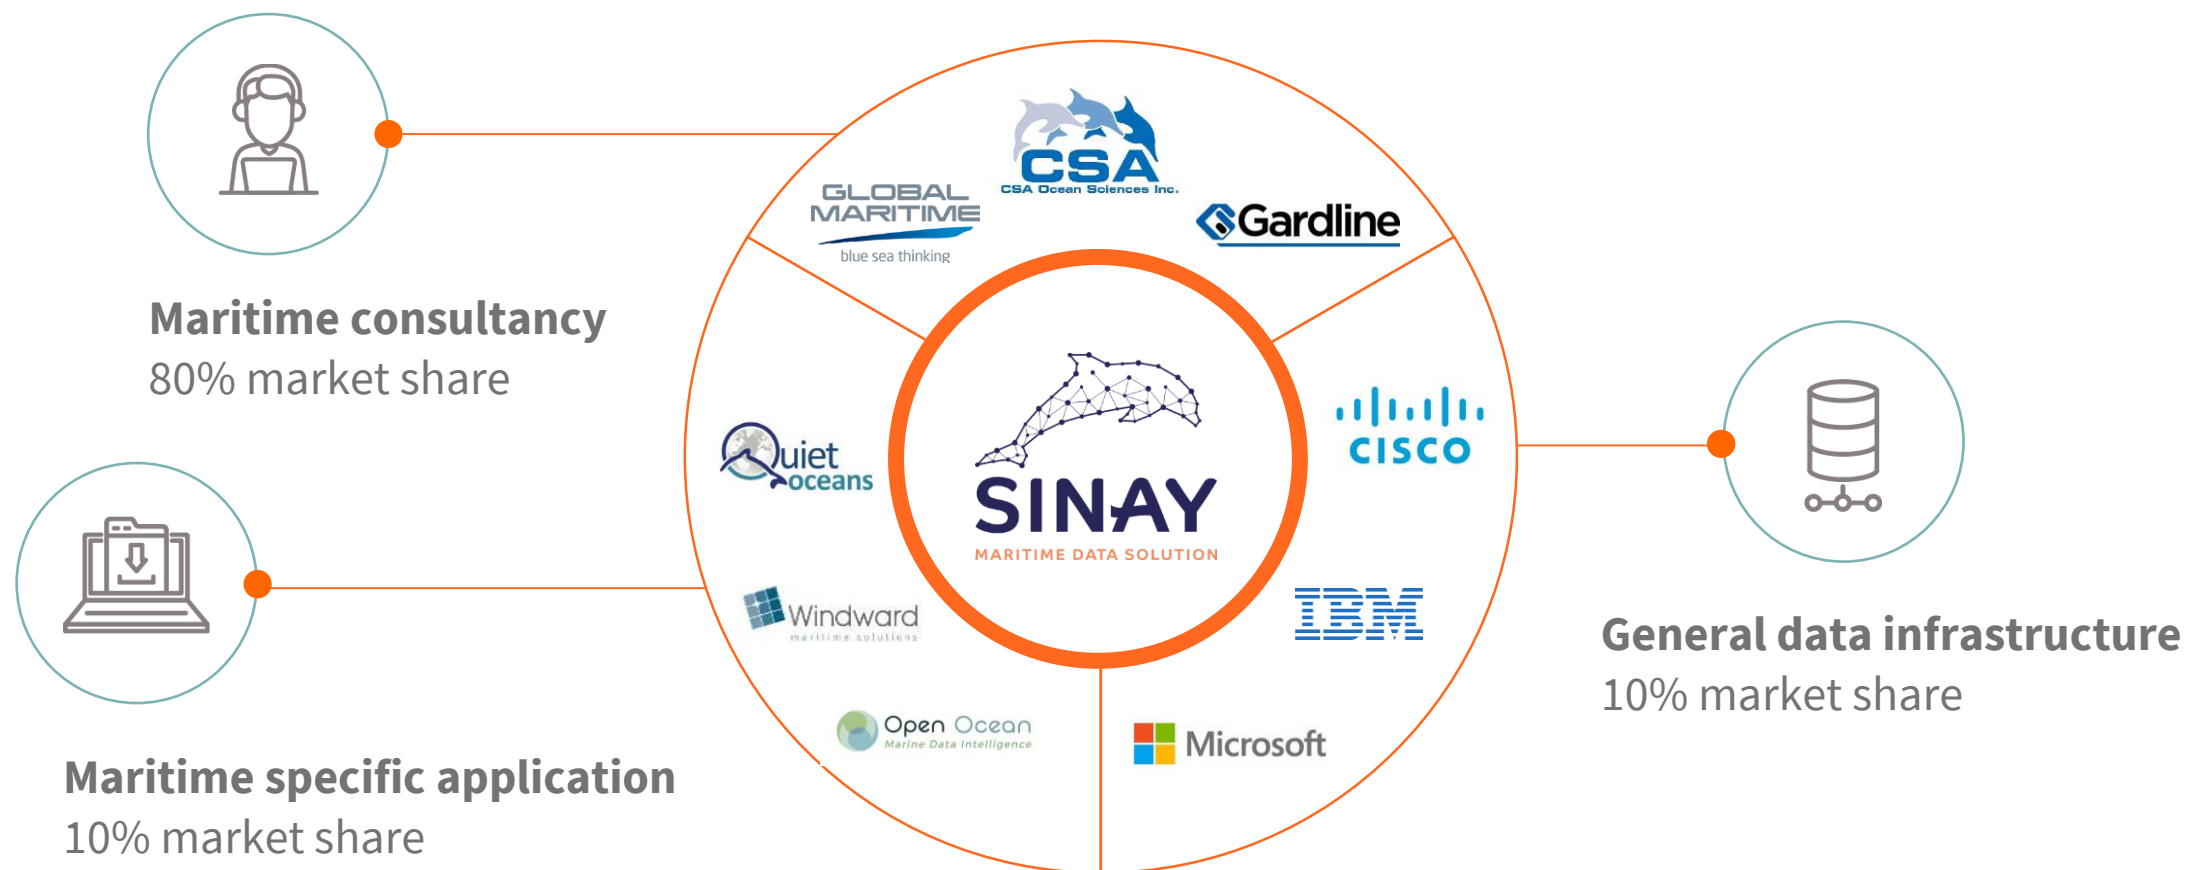

Sinay Hub enables companies to track all real-time key maritime indicators they need

Sinay gathers data from all over the world... ...and transforms it into key indicators using AI

Competitive Landscape

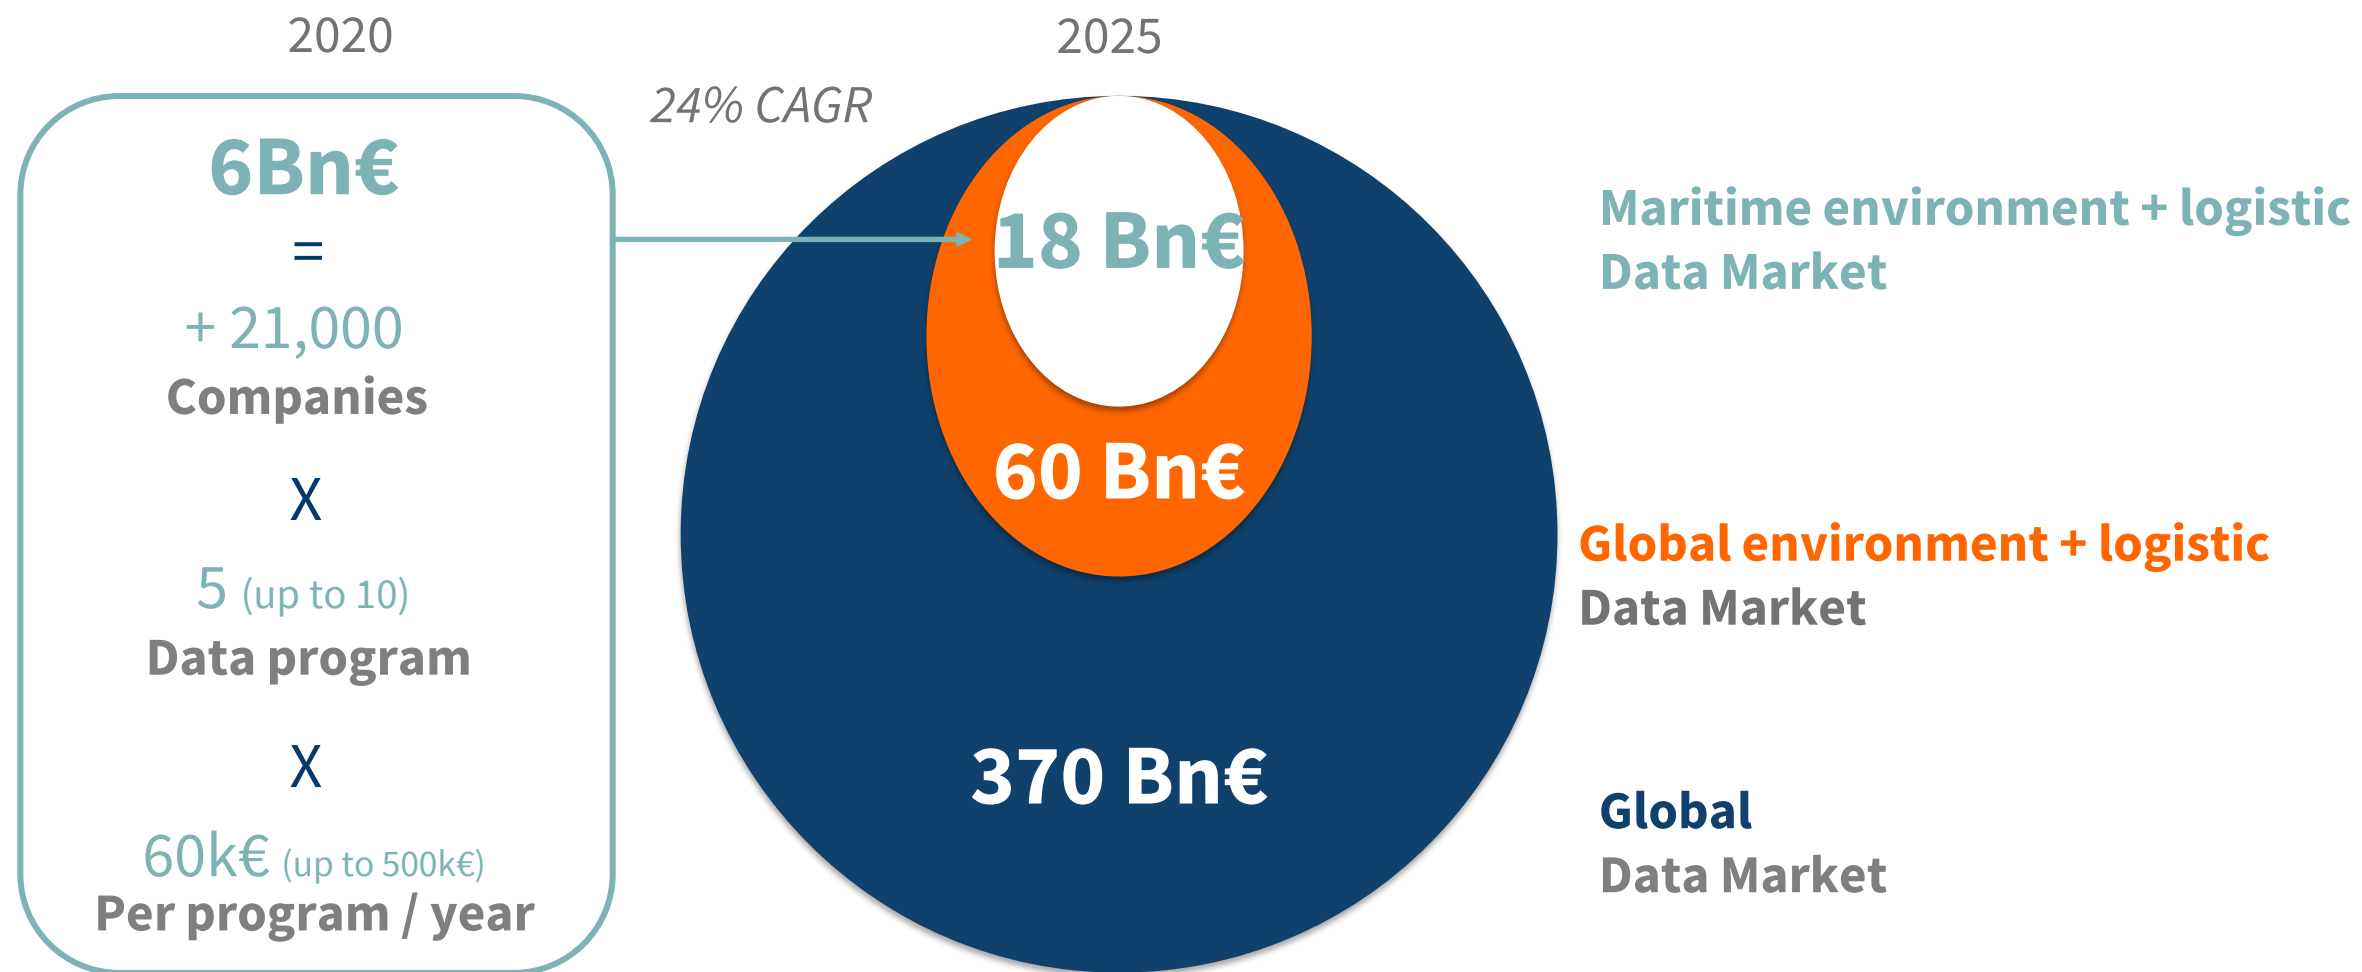

Unique positioning in the ecosystem

Market

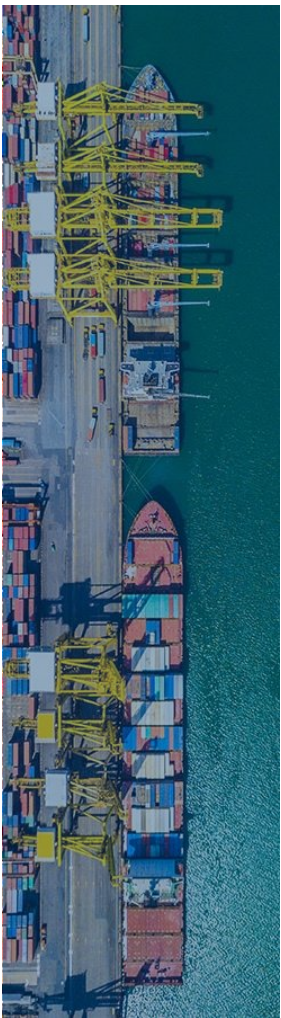

Booming demand in data analysis for maritime companies

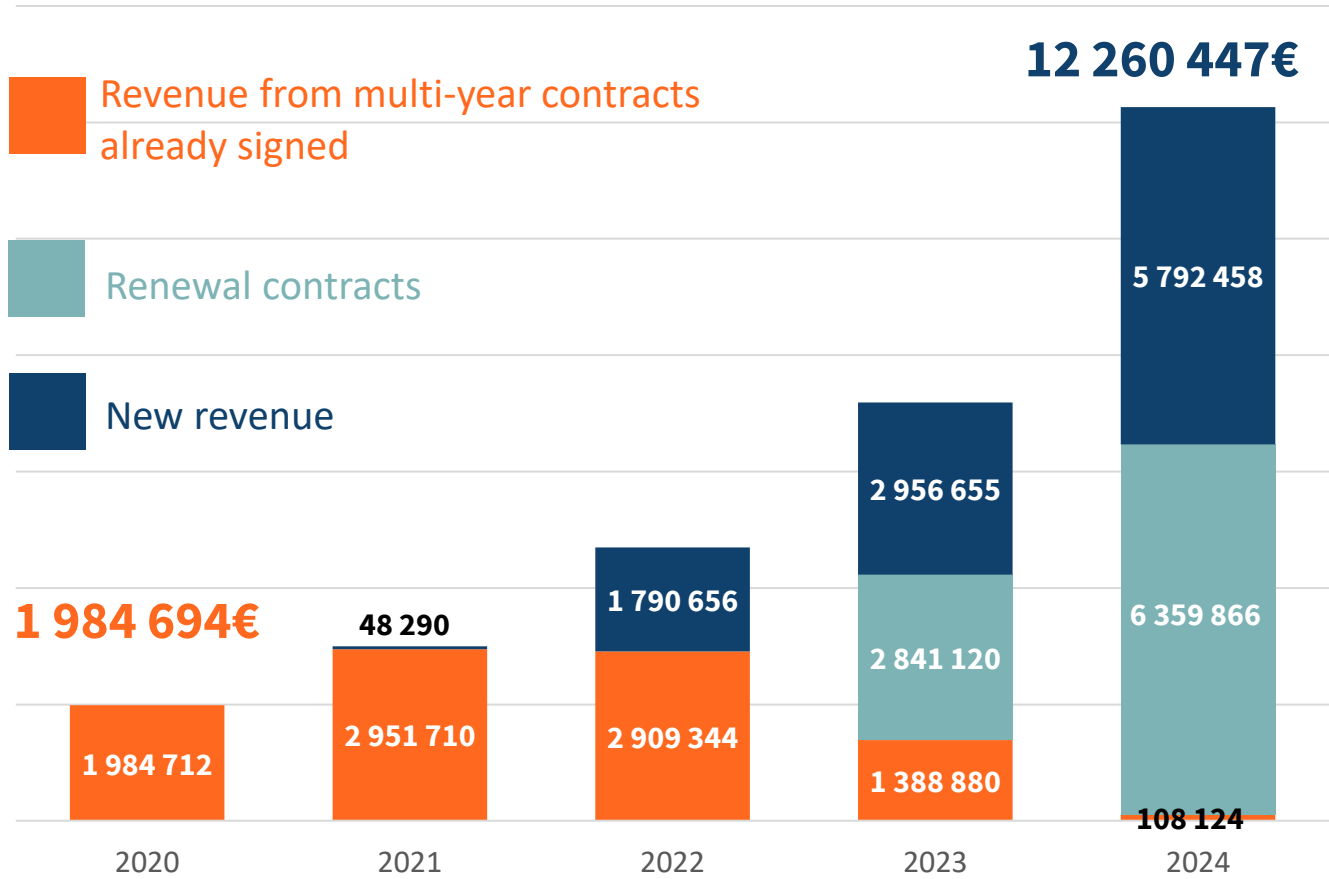

Forecast

Revenue growth in 3 years

Revenue Forecast - €

2026 Target
45 M €
